**Hoop your stabilizer (I use tear away)
and stitch the placement line.**

**Lay your felt down for the body, this will
be your main piece of felt. Stitch the
face details.**

**Run the placement line for the shirt.
Then place the shirt felt over the line.**

**Run the tack down stitch and only trim
around the stitched area. When finished, it
will look like the picture below.**

Put a full piece of felt the size of your placement line (this varies depending on the size of the device you're making the cover for) over placement line and another piece ½ inch below the placement line.

Put the hoop back onto your machine and finish up the final steps. Trim ¼ inch from the edges and you're done!
