

# In the Hoop Round Bow

By Dejah Vue Designs

These bows are a one step design- Hoop your tear away stabilizer and lay 1 layer of felt on top **do not use spray adhesive**. (or you can hoop felt and not use stabilizer this is a preference.) and Stitch - Pull all stabilizer off back

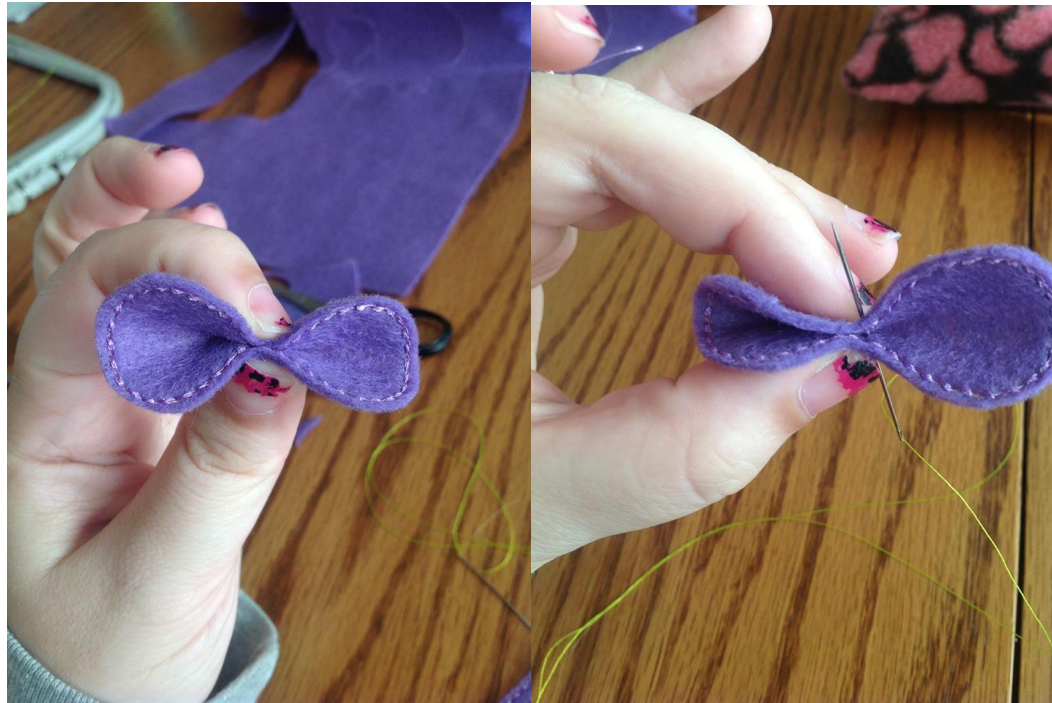

1) Trim all knots/threads on back of bow

2) Trim close but not cutting the stitches

- 3) Fold bow in half and Take Needle and thread with knot on end and go through center of bow.

- 4) Wrap thread around center of bow 5-6 times and put needle back through center of bow tying a knot. (trim thread)
- 5) Add dab of glue (hot glue or Fabritac works great) wrap center of bow around center. This center may be long just in case you want to add to a hair tie, headband, clip etc.

\*\*\*\* To make double layer add bow part from 2 sizes down for example if you're making size 9 bow also stitch size 7 bow and use fold and sew them together\*\*
